## Circulatory System (Pg. 82-89)

| Group 1: The heart (Pg. 84)  |
|--|
| Define the bolded words in the text.   |
| Heart:   |
| Atria:   |
| Ventricles:  |
| Valves:  |
| Draw a diagram of the heart and label the parts. On page 34 in your student work book complete the activity showing the flow of blood through the heart. |

| Group 2: Circulatory System (Pg. 85)   |
|--|
| Define the bolded words from the textbook.   |
| Circulatory System:  |
| Blood Vessels:   |
| Label the parts of the worksheet provided (BLM 1-34). Complete the worksheet using the textbook. |
| Group 3: Types of Blood Vessels (Pg. 86-88)  |
| Define the bolded words in the text.   |
| Arteries:  |
| Aorta:   |
| Arterioles:  |
| Capillaries:   |
| Venules/Veins:   |

| Answer the following questions:                             |
|---|
| 1. What do arteries carry?                                  |
|   |
|   |
| 2. What do veins carry?                                     |
|   |
| 3. How is blood oxygenated?                                 |
| 3. How is blood oxygenated:                                 |
|   |
| 4. What is the only artery that carries deoxygenated blood? |
|   |
|   |
| 5. What is the only vein to carry oxygenated blood?         |
|   |
|   |

| Group 4: Components of Blood (Pg. 88-89)   |
|--|
| Define the bolded words in the textbook.   |
| Blood:                                     |
|  |
| Plasma:                                    |
|  |
| Red Blood Cells:                           |
|  |
| White Blood Cells:                         |
|  |
| Platelets:                                 |
|  |
| Answer the following questions:            |
| 1. What carries oxygen in red blood cells? |
|  |
|  |
|  |

2. Where are red blood cells produced?
